Update Query - Updates the description of the 'Pancakes' recipe.

[illegible]

Delete Query - Deletes the 'Pancakes' recipe.

Select Query with Filtering - Finds recipes with 'Chocolate' in the title and category ID = 1.

[illegible]

Automatic control is disabled. Use the manual control to manually generate a new current card or to toggle a card for help.

Join Query - Lists recipes with their ingredients and quantities.

Users Table - Shows user data, supports joins and subqueries.

The screenshot shows a database application interface. At the top is a toolbar with icons for file operations, execution, and search. Below the toolbar is a text area for SQL queries. The first query is `SELECT * FROM Users;`. Below the query area is a large empty space. At the bottom is a 'Result Grid' section. It has a toolbar with 'Filter Rows', 'Search', 'Edit', and 'Export/Import' options. The grid displays a table with two columns: 'user_id' and 'email'. The table contains six rows of data. To the right of the grid is a sidebar with 'Result Grid' and 'Form Editor' tabs. At the bottom right are 'Apply' and 'Revert' buttons.

SQL Editor:

```
1 • SELECT * FROM Users;
2
```

Result Grid:

user_id	email
1	A alice@example.com
2	B bob@example.com
3	C carlos@example.com
4	D diana@example.com
5	E emma@example.com
6	D sam@example.com

Categories Table - Displays recipe categories.

[illegible]

Ingredients Table - Used in many-to-many relationship.

[illegible]

Recipes Table - Shows all recipes stored.
